## Lasers In Dermatology And Medicine

Introduction The first lasers used to treat skin conditions occurred over 40 years ago. Argon and carbon dioxide (CO<sub>2</sub>) lasers were commonly used to treat benign vascular birthmarks such

## Online Library Lasers In Dermatology And Medicine

as port-wine stains and haemangiomas. Although these birthmarks could be effectively lightened, a side effect was the unacceptably high rate of scar formation.

---

Lasers in dermatology | DermNet NZ  
Dr. Anderson predicted that fiber lasers, which are highly advanced for industrial applications, will play an increasing role in dermatology and in other areas of medicine. “There are not a new kid on the block anymore but fiber lasers are relatively new to medicine,” he said during the meeting, which was sponsored by Harvard Medical School, Massachusetts General Hospital, and the Wellman Center for Photomedicine.
