Nocturnality is an animal behavior characterized by being active during the night and sleeping during the day. The common adjective is "nocturnal", versus diurnal meaning the opposite. Nocturnal creatures generally have highly developed senses of hearing, smell, and specially adapted eyesight. Some animals, such as cats and ferrets, have eyes that can adapt to both low-level and bright day ...

The opening Marcia on the first of the notturni unforgettably sets the tone, almost prefiguring the first movement of Bizet's Symphony in C, with a blitheness of spirit and the most radiant inspiration. All eight of the notturni have it, more so with the superb playing in every note, and excellent sound to help bring it out.
